Hybrid DM Options

Hybrid DM Options

DM Latch Bolt with Spring & Mtg Bracket (Part # S42955A00)

The optional DM latch bolt with spring and mounting bracket offers mounting alternatives for the Hybrid Type DM Interlock. The mounting bracket is designed to hold the latch bolt in close proximity to the Hybrid DM lock body.

A sliding door or gate is a good application for this style of latch bolt.

All components of the S42955A00 DM latch bolt are made from electropolished 316 stainless steel.

To order the latch bolt with spring and mounting bracket just specify the part number S42955A00 latch bolt with your DM Interlocks.

DM2 Adapter Plate (Part # 122161001)

The DM2 adapter plate is designed to allow easy replacement of DY2 interlocks with DM interlocks. Because of the large number of DY2 interlocks installed in the field we recognized a need for a mounting plate that will accommodate the DM interlock. The Hybrid DM interlock will bolt to the DM2 adapter plate with 3/8-16 x 1-3/4" bolts.

The DM2 Adapter Plate is made from zinc plated steel and can be bolted or welded to your door or door jamb.
