MERCURY FREE STATEMENT

Dear Valued Customer,

In response to your inquiry, following is Kirk Key Interlock's statement on the "Mercury-free" status of products from Kirk Key Interlock's:

Mercury is a naturally occurring element that is found in materials and chemicals at trace levels. For this reason, Kirk Key Interlock defines "mercury-free" as not having mercury at greater than detection limits of 0.001 wt. % for solids, and 0.001 mg/l for liquids.

Kirk Key Interlock's products are not produced using mercury or any mercury compounds. In addition, the product does not come into contact with mercury or mercury bearing compounds during manufacturing, inspection, and testing, at more than trace levels as defined above.
